LOQMANN BENHADDYA

AI Engineer · AI Lead at Digiteka · Data & Machine Learning Engineering Student, EFREI Paris

Paris, France | +33 6 52 64 01 83 | loqmannbenhaddya.pro@gmail.com | linkedin.com/in/loqmann-benhaddya | github.com/skezu

SUMMARY

Engineering student with 3 years of industry experience, shipping generative AI products and agent systems to production. I lead the company-wide AI transition at Digiteka (video adtech) and build an AI-native SaaS as the sole engineer of Yudrab. **UC Berkeley Young Talent of the Year 2023.** Coding since age 9. Seeking an international internship in AI / Machine Learning engineering.

EDUCATION

EFREI Paris | Engineering degree (Diplôme d'ingénieur, MSc level) in Data & Machine Learning, work-study track — Expected 2028

Université Paris-Saclay | Bachelor of Technology (BUT) in Computer Science, work-study track — 2022 – 2025

Blent.ai | Intensive Computer Vision Bootcamp · Baccalauréat (Mathematics & Computer Science), highest honours — 2022 – 2023

EXPERIENCE

Digiteka | **AI Lead (apprenticeship)** — Paris, France · Sep 2023 – Present

Video adtech for media publishers. Joined as a web developer, promoted to lead the company's AI strategy and adoption.

- **Generative video:** architect and lead developer of an AI pipeline that automatically turns a news article into a vertical video; also shipped AutoCut (automatic 16:9 to 9:16 reframing) and an in-house web video editor.
- **AI transformation:** designed and now run the staged transition of every team to effective AI use, from change management and training to hands-on support through implementation.
- **AI platform:** own the company's AI environment (Claude Team, MCP connectors to internal systems, scheduled agents) and drive the media team's agent roadmap across 7 use cases.
- **Automation:** built client Business Reviews generated from ClickHouse SQL and LLM synthesis, alerting, and CRM-connected prospecting (n8n, Make), saving each team several hours per week.

Yudrab | **Co-founder & CTO** — Remote · Nov 2025 – Present

Marketplace and SaaS that helps European entrepreneurs set up companies in the UAE. One-person engineering team.

- **AI assistant and agent harness, built end to end:** acts in the CRM within each user's permissions with human approval for sensitive actions, runs scheduled tasks proactively, and answers with generative UI (tables, charts, forms).
- **Production-grade safety:** prompt-injection defences, full audit trail, budget controls and evaluations against real models; exposed a public API and an MCP server so firms can connect their own AI tools.
- **Full product shipped solo** with an AI-first workflow built on Claude Code agents: iOS and Android app (Expo / React Native), CRM and desktop app (React, TypeScript), backend (Node.js, PostgreSQL, Stripe).

Data Wise Academy | **Teaching Assistant, Generative AI for Data** — United States · Nov 2024 – Nov 2025

Corporate training programmes led by Gauthier Vasseur for Nissan (Nashville) and L'Oréal / SalonCentric.

- Coached managers through 3-day generative AI hackathons (Power BI, Tableau, AI-assisted development); delivered use cases automated Excel/CSV work, financial reporting and information synthesis, saving participants several hours per week.

Stanford Continuing Studies | **AI & Automation Co-Instructor** — Nov 2024 – Nov 2025

- Co-taught AI and automation to an international audience of working professionals. Also guest speaker on "AI and the Future of Software Engineering" for computer science students at IUT d'Orsay, Université Paris-Saclay (2025, 2026).

AWARDS

- **Young Talent of the Year** — UC Berkeley World Business AI & Analytics Summit (2023)
- **Talent Award (Prix du Talent)** — best apprentice of the BUT cohort, CFA numiA / Université Paris-Saclay (2025)
- **National Winner, KESK'IA AI programme** (1st edition, 500 applicants) · **Startup Pitch Winner, VivaTech 2023** (GreenAI)

PROJECTS & LEADERSHIP

- **GreenAI / "C du Propre" (2023):** computer vision system that detects and geolocates litter from citizen reports, giving cities a single AI-assisted channel (object detection, AWS SageMaker, deployed API).
- **OSMOZ, Co-founder (2023 – Present):** non-profit making AI and data accessible to young people through workshops, events and a conference with Silicon Valley experts. Also organised a national NASA Space Apps Challenge hackathon featuring a NASA expert.

SKILLS

AI / ML: LLMs, AI agents, MCP, harness / context / prompt engineering, LLM evals, generative video, deep learning, computer vision

Programming: Python, TypeScript, JavaScript, SQL, Java, C, C++, C# · PyTorch, scikit-learn, OpenCV · React, React Native, Node.js

Cloud & Data: AWS (EC2, Batch, Lambda, SageMaker), GCP, ClickHouse, OpenSearch, PostgreSQL, Docker, n8n, Make

Certifications: OpenAI Academy (3 pathway certificates: OpenAI API, Codex, Apply AI at Work) · Anthropic Claude Academy (8 badges: MCP, tool use, evals, Claude API) · Google Cloud (Build Agents with ADK, MLOps for GenAI) · Hugging Face (Fundamentals of Agents)

Languages: French (native) · English (fluent, full professional proficiency) · Spanish (intermediate, B1)
